

- Cilindro a profilo europeo serie K2
- 10 spine
- Chiave piatta reversibile
- 1 chiave da cantiere
- 3/5 chiavi in ottone nichelato
- Carta di proprietà numerata
- Vite di fissaggio
- Possibilità di esecuzione in KA pag. 146
- Chiave a duplicazione libera
- Cilindro resistente al trapano

- European cylinder line K2
- 10 pins
- Reversible flat key
- 1 site key
- 3/5 brass nickle keys
- Numbered property card
- Fixing screw
- KA execution on request page 146
- Free key duplication
- Cylinder resistant to drill

 Cilindro con "SISTEMA CHIAVE DA CANTIERE": si utilizza la prima chiave in fase di cantiere, successivamente a lavori ultimati, si consegna al proprietario un set sigillato di chiavi che, modificando la cifratura, esclude e rende inutilizzabile la chiave usata in precedenza.

 Cylinder with "SITE KEY SYSTEM" that allows the use of the first key (site key) during workings. Then when workings are over, you will hand to the final owner the keys in sealed bag that by modifying the code will make the site key not operative anymore.
